HEALTHY HUMANS BENEFITING FROM BIODIVERSITY

Biodiversity means lots of different living things working together in nature.
A healthy environment helps keep people healthy too!

1 THE BUILDING BLOCKS OF A HEALTHY WOODLAND

Draw a picture of each building block. Then write one way it helps the environment.

HEALTHY SOIL	NATIVE PLANTS	NATIVE ANIMALS	TREE HOLLOWS	LEAF LITTER	CLEAN AIR	CLEAN WATER
						
It helps by... _____ _____	It helps by... _____ _____	It helps by... _____ _____	It helps by... _____ _____	It helps by... _____ _____	It helps by... _____ _____	It helps by... _____ _____

2 HOW BIODIVERSITY HELPS PEOPLE

Draw a line to match each part of nature to how it helps humans.

 Healthy Soil	•	 We need it to drink and to stay healthy.
 Native Plants	•	 We breathe it in to help our bodies.
 Native Animals	•	 We get food, medicine, clothes and shade from plants.
 Tree Hollows	•	 They help pollinate plants, eat pests and are part of the food chain.
 Leaf Litter	•	 It gives us nutrients to grow food and plants.
 Clean Air	•	 They provide homes for animals so they can stay safe.
 Clean Water	•	 It protects the soil, keeps moisture in and provides tiny homes.

3 WHAT HAPPENS IF ONE BUILDING BLOCK IS REMOVED?

Choose one building block above and draw what might happen if it was taken away.

4 WHAT CAN I DO?

Draw or write one action you can take to help our environment.

When our environment is healthy, people and wildlife can all live happy and healthy lives!
