

Name: _____

Date: _____

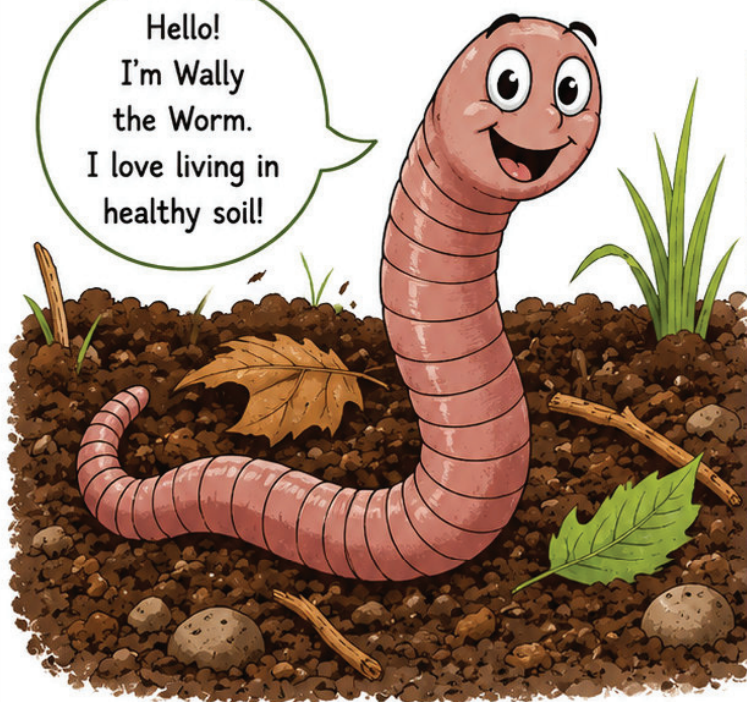

Meet Wally the Worm!

Wally lives beneath the soil in the Grassy Box Woodland.

He is small, but he has a BIG job!

Hello!
I'm Wally
the Worm.
I love living in
healthy soil!

Wally's Important Jobs

-  I eat old leaves and plants.
This helps break them down.
-  I make tiny tunnels in the soil.
These tunnels let air and water move through.
-  My tunnels help roots grow strong and healthy.
-  I help keep the soil healthy so plants, animals and people can all thrive!

Let's think like Wally!

Where does
Wally like
to live?

What does
Wally like
to eat?

Who might
Wally meet
underground?

How does
Wally help the
woodland?

How would
you like to be
Wally for a day?

Remember: Healthy soil means a healthy woodland.
Thank you, Wally, for all your amazing work!
