

Expressions of interest: Cover cropping project

Crop Smart: Covering the ground with confidence

Expressions of Interest (EOI) are sought from growers to participate in a new project being delivered across the North West Local Land Services region through to June 2026.

Funded by Local Land Services and the SQNNNSW Innovation Hub, this project will support growers to trial researched cover cropping techniques that enhance soil health and contribute to long-term productivity gains. The project recognises that strategically timed cover crops when matched to seasonal conditions, soil types and local climate, can improve fallow efficiency, increase ground cover, and build resilience into farming systems.

Participating growers will receive:

- specialised one-on-one agronomic advice and a tailored plan for your business
- soil and plant testing to inform decision-making and to track change over time
- ongoing support and monitoring from agronomists and Local Land Services staff throughout the project.

Growers are encouraged to express their interest as places are limited, so please register your interest early.

Region

North West NSW & open to border region growers

Date and time

EOI closes 30 August 2025
